Re: Testimonial

It is my great pleasure to write this testimonial in support of Mr. Bradley Brown and his firm, Brownfield Environmental Engineering Resources. Brad has served as our primary environmental engineering consultant for all our asbestos abatement projects for the past several years at LaSalle-Peru Township High School. Brad is a top notch professional and a joy to work with. He is prompt, courteous and continually works to provide our District with the highest quality service at the most affordable price.

Besides the strong knowledge base that Brad brings to the table, what particularly stands out with Brad is his calm approach coupled with an ability to hold our contractors accountable and to ensure projects are completed on time with minimal change orders. I cannot say enough about Bradley Brown. LaSalle-Peru Township High School has been thoroughly pleased with the high quality service and care we have received.

I offer my highest recommendation in support of Brownfield Environmental Engineering Resources to any school district or organization that is in need of support and service regarding environmental work.

Sincerely yours,

Steven R. Wroblewski  
Superintendent
